MANCHESTER NEWS.

City Council.—A meeting of the City Council was held at quarter-past 9 o'clock last night. Present: C. C. McRae, president, and Messrs. Brooks, Craig, Eubank, Gallegher, Moles, Monteiro, and Weisiger. Mr. Craig, from the Finance Committee, reported that they had examined the books of the Commissioner of Revenue, and re-

commend that he be paid for his services. The value of the personal property in the city is \$156,206; that of real estate and improvements, \$1,256,365. The tax on the personal property is \$3,192.27; on real estate, \$21,985.52 The amount of poll-tax is \$528.50. Total amount of tax, \$25,177.79. The report was received and adopted.

Colonel Amber by leave presented a claim from the county of Chesterfield against the city of Manchester for rent of the court-house (\$550), balance due; to amount allowed by arbitrators for repairs on the court-house, \$1,025, and to balance due for Manchester's proportion for salt furnished by Buchanan, Stuart & Co. during the war, \$307.48-the total amount of the claim being \$1,883.48.

Mr. Craig offered a resolution that the Finance Committee be instructed to settle the above claims if the county will omit all charges against the city for Peter Jamison, a pauper, whose case is now in litigation, and so much of the county claims as refers to the salt claim, as the charter provides in what manner the claims of the county versus the city shall be settled. The salt claim to be settled at the next levy.

The resolution was adopted. After the transaction of other unimportant business the Council adjourned.

Conservative Meeting Postponed .- As many of our citizens wished to attend the un-store. Masonic Lodge on the occasion of the festivities of St. John, Superintendent Jordan has postponed the ward meetings to elect delegates to the State and other conventions until Wednesday, June 27th, at 8 o'clock.

The New Council .- The new members of the City Council do not enter upon their duties until July 1, and not last night, as has been erroneously reported.

A Pleasant Trip .- A number of our citizens enjoyed a fine barbecue and fish-fry at Warwick, on James river, yesterday.

Company, of Baltimore; George G. Caldwell, the inventor; L. J. Warren, the secretary of the company; Captain Jeremiah Cotterell the commander; and Captain Black the pilot. A run of about five miles was made,

never before seen in this latitude. As she glides along not a ripple astern is seen, and no perceptible displacement of the water street. except the little made by the cutting of the except the little made by the cutting of the bow. She can be backed and turned with perfect ease, and in order to reverse her motion the streams of water are driven through the bow-nozzles, and the craft obeys on the instant. If the boat were to spring aleak, the pump would simply draw its supply from the hold and go on with its work. It is also claimed that a vessel provided with this appliance could not sink under ordinary leakage. A remarkable feature of the Caldwell contrivance is that the power which propels will also steer. In order to accomplish this the nozzles are worked alternately from side to side, using the streams as levers, on the principle of the oar. In case of fire on board or about the docks a fine of hose is attached to the pump, and in a second there is a floating steam-engine. This hose was tried yesterday. The inventor claims that this device can be profitably applied to any vessel, although it is mainly intended for canal service, where the demand is for a cheap propeller that will not wash the banks. The "Alpha" only consumes a quarter of a ton of coal per day.

Steam on Canals—The Wonderful Inventor of a Baltimore Mechanic.

[Philadelphia North American.]

The little steamer Alpha, a Baltimore built boat, constructed on the tug-boat model, and whose motor is designed for propelling crafts on canals and do away with mule-power, was given an experimental trip on the Schuylkill river and canal yesterday afternoon. The party on board consisted of Mr. Zulick, general superintendent of the Schuylkill navigation; H. Wheatland, canal collector at Fairmount; Yo in Ahern, president of the Caldwell Motor Company, of Baltimore; George G. Caldwell, the inventor of the Caldwell of the caldwe PRUSTEE'S SALE OF VALUABLE P. P. WINSTON. Substituted Trustee.

the commander; and Captain Black the pilot. A run of about five miles was made, the boat working admirably, and completely satisfying Mr. Zulick. The craft is forty-three feet in length and ten and a half feet of beam. She is furnished with one sixteen-horse-power horizontal tubular boiler and a No. 7 Knowles pump. The propelling power lies in this: From the pump to the stern are two lines of pipe, which strike the water about three feet beneath the surface. Two similar lines run to the bow. The pump drives through each pipe a 2½-inch stream, which enters the water through a ½-inch nozzle. With sixty pounds of steam the pump makes one hundred and eighty strokes a minute, each stroke driving a stream into

The Body of the Water.

This principle is the result of years of thought, experimenting, and study on the part of the Baltimore mechanic. A boat run by steam and without a wheel is a thing never before seen in this latitude. As she glides along not a ripple astern is seen, and
